Projects

Bon Appetit — *Front-end Project* *Github* *Live Demo*

The main purpose of the APP is to help users to find delicious recipes everyday. The App includes trusted resources with hundreds of meals (and don't forget about Desserts:)) The app is user friendly. Every user can find recipes by clicking on sorted courses. Every course includes simple directions with measurements. If you are in a rush, you can simply use a search bar.
(HTML, CSS, JavaScrip, Bootstrap)

Healthy me! — *Back-end Project* *GitHub* *Live Demo*

The purpose of the app is to track your Physical Health, Mental Health, and Long Term Goals. By creating lists that a user can reference at any time, one will be able to become more accountable when setting out to complete a task, no matter how big or small.

(CSS, Mustache, JavaScript, Node.js, Express.js, Sequelize)

React App — *React Project*

Lorem ipsum dolor sit amet, consectetuer adipiscing elit, sed diam nonummy nibh.
